

Demonstrate your commitment to the environment: BS EN ISO 14001

What is ISO 14001?

ISO 14001 sets out the requirements for an environmental management system. It has been designed to enable companies to minimise their negative impact on the environment by reducing waste, using resources efficiently and ensure compliance with applicable laws and regulations.

What benefits does certification to BS EN ISO 14001 present?

- Better management of environmental risks, now and in the future
- Increased access to new customers and business partners
- Demonstration of legal and regulatory compliance
- Competitive advantage and the trust of stakeholders
- Overall cost savings: in terms of consumption, waste and recycling
- Meets supply chain requirements and/or qualify for a tender or preferred supplier status

Their specialist knowledge in the steel industry assists us in our commitment to continuous improvement across a number of certifications, one of which is BS EN 14001.

John Reid & Sons (Strucsteel) Ltd, SCCS Client

SCCS is the UKAS Accredited Certification Body (0021) specifically for companies engaged in design, manufacture and installation of structural steelwork and associated products and services. The objective of the Scheme is to secure high standards of excellence and quality across all processes, procedures, and practices through independent certification to specific standards. The technical knowledge, practical skills and sector experience the team and auditors bring, makes SCCS the go to certification and auditing providers in the steel industry.
