

Demonstrate your commitment to quality: BS EN ISO 9001

What is ISO 9001?

This standard defines the basic requirements for a company's QMS (Quality Management System), which if gained, proves to clients that you can consistently provide products which meet their needs and expectations.

The quality mark provides evidence that there is the commitment to continuous improvement of processes and assurance of compliance with relevant regulatory requirements.

How will BS EN ISO 9001 benefit your company?

- A preferred status for tenders
- Improves internal working
- Helps to win more business and increase profitability
- Reduces costly errors and re-work
- Enhances your company status
- Improves internal communications and helps to motivate staff
- Improves customer satisfaction and loyalty
- Promote competitive advantage
- Provides the company with defined and standard operating practices
- Demonstrates that you have a trained and competent workforce

Specialist knowledge of our industry ensures that the audit process provides a thorough examination of our processes and procedures proactively challenging our management team to impart a genuine sense of achievement and an intrinsic understanding of the importance these standards hold for our industry.

SDM Fabrications Ltd, SCCS Client

SCCS is the UKAS Accredited Certification Body (0021) specifically for companies engaged in design, manufacture and installation of structural steelwork and associated products and services. The objective of the Scheme is to secure high standards of excellence and quality across all processes, procedures, and practices through independent certification to specific standards. The technical knowledge, practical skills and sector experience the team and auditors bring, makes SCCS the go to certification and auditing providers in the steel industry.
