

Save time and resources with the Common Assessment Standard

What is the Common Assessment Standard?

The Common Assessment Standard is a comprehensive accreditation developed by Build UK, with the support of The Civil Engineering Contractors Association, to streamline and standardise the pre-qualification process, making it more efficient and cost-effective.

Common Assessment Standard (CAS) is a standardised question set which incorporates PAS 91 and corresponding assessment standards, which covers 10 key areas to assess a company's competency. There are 2 options for CAS assessment; SCCS Build Assured Lite, which is desk based and a more comprehensive site based offering; SCCS Build Assured Elite.

Why get Common Assessment Standard Accreditation?

- Minimise duplication in the PQ assessment process, with many main contractors and clients adopting CAS
- Ensures competitive tenders
- Demonstrates competency, compliance and reduced risk
- Data will be shared with other accredited suppliers to minimise the need to complete numerous assessments
- Reduce time and resources with a standard PQ process

“

SCCS are informative and knowledgeable providing good support during the audit. We wouldn't consider another auditor for our accreditation.

Customised Sheet Metal Ltd, SCCS Client

”

Many of the requirements of CAS are further simplified if you already hold Certified Standards with us.
