

Quality Management in Highway Works involving corrosion protection of ferrous materials by industrial coatings: NHSS 19A

What is NHSS 19A?

NHSS 19A – Particular requirements for the application of ISO 9001:2015 for corrosion protection of ferrous metals by industrial coatings. This standard, adopted by Highways England for specifications, is related to the quality management system requirements for the corrosion protection of ferrous materials in transportation infrastructure assets using industrial coatings for new and maintenance works.

What are the benefits of NHSS 19A certification?

- Meets the requirement for compliance with transport infrastructure specifications
- Demonstrates a robust QMS for organisations undertaking corrosion protection for transportation infrastructure
- Provides assurance to clients that the coatings applied to protect steel structures from corrosion are long lasting
- It will give you a competitive advantage when tendering for work

SCCS fully understand the structural steel business and offer a comprehensive suite of certifications, including NHSS 19A, that meet our own and our client's needs. They are very responsive and the level of service from the support team is outstanding.

Severfield, SCCS Client

SCCS is the UKAS Accredited Certification Body (0021) specifically for companies engaged in design, manufacture and installation of structural steelwork and associated products and services. The objective of the Scheme is to secure high standards of excellence and quality across all processes, procedures, and practices through independent certification to specific standards. The technical knowledge, practical skills and sector experience the team and auditors bring, makes SCCS the go to certification and auditing providers in the steel industry.
